

- Here is the improve requirement please keep the same structure and improve only the written section.
- The “Re-test” page is the pre-test before the user study Chinese making they know their level and what should they focus on, should appear first.
- The main function order should be: Flashcard [Chinese of flashcard], Sentence [Chinese of sentence], Writing [Chinese of writing], Achievement [Chinese of Achievement]

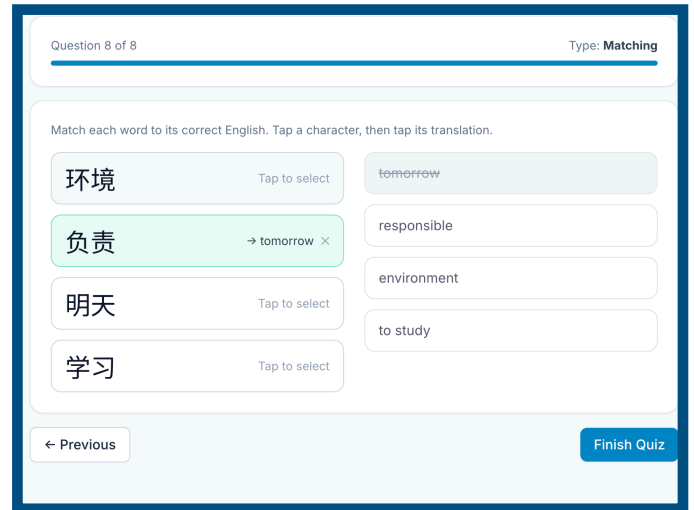

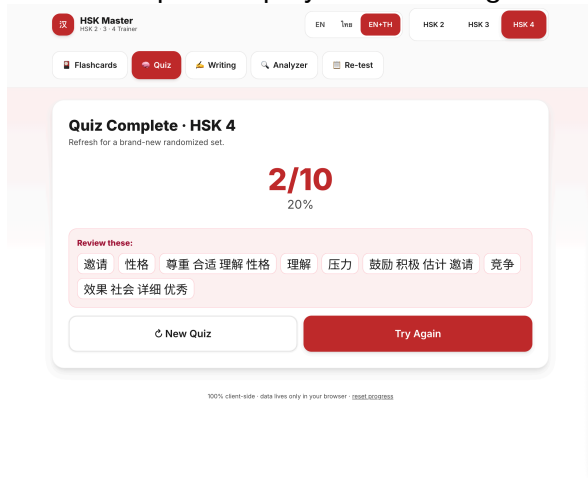

- In Flashcard page, add “Previous” in the left corner and “Skip” to the right corner; after “Got it” button, both will have arrow. Until the end of all word, words that “Need Review” Should be repeat until all is in “Got it”

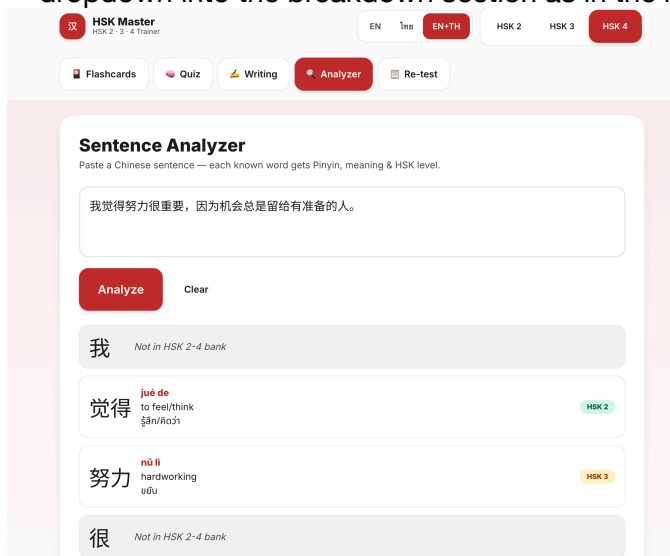

- Quiz page: provide Quiz in each level and one mix level. In mix level do not declare the level in each question, declare after the user finished the quiz with clarifications and level they should focus on.
- Quiz page, in matching section the hanzi box cannot be clicked on. To match the hanzi and meaning both box should be clickable, the interface better be like the picture in blue border.

- Quiz page: Quiz complete in the "Review these" box provide pinyin and meaning.

- Analyzer page: Change name to Sentence [Chinese word of sentence], description Paste or write Chinese sentence — each known word gets Pinyin, meaning & HSK level. Else if the word is not in word bank please give the meaning of each. Moreover, the analyse results change from dropdown into the breakdown section as in the red box picture, in horizontal.

- Writing page: create writing practice do two sub-window: Left is "Writing window" bigger suitable for writing practice this keep the original Botton and interface.

and Right: Head topic is Choose the word. Subtitle is Meaning show in [languages that users apply in the system] inside is all the word of each level show in stack scrollable box.
 - Writing page: Hint button is not working probably it's only give one hint which is the first line, fix by after one interaction, give the user the next hint. Also Clear Botton is freeze can not use please fix.
- + Achievement page: add this page to collect user's study results consist of: Name, date, Quiz results, current hsk level, Note for self.
